SANTA FE SURVEY TO GLOBE

A Los Angeles telegram of June 15 says: It is stated at the office of the

Santa Fe, in this city, that surveyord are at work surveying a route for a will bring the total amount paid in railroad from Deming, N. M., to dividends up to \$49,850,000. It is the Globe, Ariz. The line will come as directly as possible to Duncan, thence to Solomonville and on through the talley to Globe. The Santa Fe people have been considering the project for some time of running a road from the route mentioned above. It will connect the two great lines controlled by that company, and also tap Ariregion. It will also give to Arizona direct communication both east and

west over the Santa Fe system.

THE PEARCE MINE. The Bonanza Mine of Cschied County.

In the Commonwealth mine, at Pearce, the chute from which most of the ore comes, has been exploited for a for an undermined thickness ranging from 16 to upward of 60 feet. From the surface down no sorting has been done, nor are any waste dumps in forms an inconsiderable minority, are building. For the past six months the shipments show a monthly average of about 2000 tons. Many guesses have been made as to the vilne of this ore; but they are not reliable. From the hest information obtainable the monthly output is placed at upward of \$250:000.

The ore itself is quartzitie, somewhat ferruganized. It carries both gold and silver. In the upper levels the proportion of silver to gold was about 21 to 1, but in the lowest workings it has gradually changed to about even. Apparently the highest values follow the banging wall, where streaks, veinlets and inclusions, assaying heavily in silver, have been encountered. The company has proceeded cautiously and thoroughly explored its ground before deciding upon reduction works. At present a mill is building which will have 60 tons daily capacity, capable of ready expansion to 80 tons and comprising the following appliances: The ore is first crushed in a property, where it expects to at once pulverizer, thence passes to amalgamsting pans, from these to settlers and receives final treatment on Frue van-An old mining man said to the Star | ning machines. The tailings later on vesterday: "Why is it that miners may or may not be subjected to some
